Senior UX Designer · I design AI products, then ship them

Chennai · LinkedIn · Portfolio

40	1 week+	2
merged PRs as a designer, in 10 months	of build time saved by a 125-file working handoff	knowledge-sharing sessions, each with its own site

SUMMARY

Designer who builds with AI. For ten months I've shipped production code on Appian Composer, an AI agent that builds enterprise apps. I design how people direct, review and undo AI work.

EXPERIENCE

Appian · Senior UX Designer — Jan 2025 – Present

Promoted from UX Designer II in Oct 2026

- **Shipped UI myself in 3 codebases.** Plan approval, agent modes, keyboard-scrollable chat tables, built with Claude and Kiro.
- **Made AI edits undoable.** Autosave adopted after my usability test; checkpoint restore shipped.
- **Gave engineers working code.** A **125-file** handoff saved **over a week** before Appian World 2026.
- **Ended pull-code-to-review.** Per-branch Storybook previews: reviewers check UI changes from a link.
- **Made trade-offs visible.** A prototype compared three ways a plan becomes objects.
- **Ran 2 knowledge-sharing sessions**, each with its own site: learning-with-ai, what-becomes-our-work.

Spotknack · Mentor — Jan 2025 – Jul 2025

- Coached **5** college students through end-to-end design workflows.

WNS-Vuram · Associate UX Engineer — Aug 2021 – Dec 2024

Joined as a UX Engineer intern in 2021

- **Replaced a bank's OneNote work.** Researched AML/CTF case management, designed the data views.
- **Made usability measurable.** UX scorecard and acceptance criteria, with UX testing in Agile sprints.
- **Won a client award** for UI/UX on a digital escrow SaaS app (as an intern).

EDUCATION

- **B.Eng., Electrical and Electronics Engineering**, Karpagam College of Engineering — 2022
- **Nielsen Norman Group**: Application Design for Web and Desktop; Information Architecture — 2024
